

# Engage, Identify, Examine

## A Workshop on Participatory Photo Mapping

**Participatory Photo Mapping (PPM)** is an integrative tool for documenting and communicating the experience of place to community stakeholders and decision-makers.

In this workshop aimed at health researchers and clinicians engaged in community-based collaborative projects, **Dr. David Brown** will introduce PPM techniques, provide illustrations of its applications and engage participants in a discussion about the use of innovative methods in community-based participatory research. The workshop will also address critical aspects of community-research partnerships in such projects.

**Friday, March 12, 2010 | 1 – 5 p.m.**

Room 660, Engineering/Computer Science Building (ECS), University of Victoria

**Dr. David Brown, PhD**, is a social scientist with the Child and Family Research Institute, based at the BC Children's Hospital in Vancouver, and a Clinical Assistant Professor in the Faculty of Medicine at the University of British Columbia. His research interests include the organization of health services, processes of social support, and methods of community-based health research. He is currently involved in an emerging project on the experience of urban place within a community of adolescent cyclists.

**Presented by the BC Child and Youth Health Research Network**  
Registration is **free** for CYHRNet members, but space is limited. For more information or to register, please visit CYHRNet at [www.cyhrnet.ca](http://www.cyhrnet.ca)
